Communication Plan

• New student-facing materials
• Student orientation Resource Fair
• Summer Bridge
  o Parent/family brochures
  o Student brochures
The RISE Experience is an opportunity for your student to gain practical knowledge of a discipline and intended career within a course. It is an academic and professional development opportunity that challenges students in four areas of growth: research, international, service learning, and experiential learning.

A Unique Position

RISE puts your student in a unique position and each semester allows students to:
- gain cultural experience at home or abroad
- work with a neighborhood organization
- participate in an internship or field work opportunity
- produce new knowledge or works of art
- participate in a meaningful research project with professors

RISE also provides the skills, knowledge, and experiences that are highly prized by employers and establishes the foundation for future leaders.

Courses

RISE Experience courses include one or more of the following topics. Students don’t sign up for RISE—they register for courses that incorporate a RISE Experience as part of the curriculum. All IUPUI students are challenged to complete at least two of the four RISE Experiences before graduation.

- Research
  From fuel-cell technology to the impact of homelessness on society, projects and research opportunities often lead to new knowledge empowering the community and world.

- International
  IUPUI provides elaborate opportunities for your student to study abroad, participate in collaborative programs with international institutions, and learn from international students on campus.

- Service Learning
  Through service activities your students can learn civic responsibility and engage with different aspects of the global community they might not otherwise encounter.

- Experiential Learning
  In the heart of downtown Indianapolis, IUPUI offers access to top companies, government offices, and nonprofit organizations providing your student opportunities for involvement in professional settings and practical experience.

Selecting RISE Courses

RISE Experience courses are available every semester. Students can work with an advisor to select courses that best suit their interests and major. Visit rise.iupui.edu to learn more about the benefits of RISE and search for available courses for upcoming semesters.

*RISE Experiences are not required for graduation or degree completion.
The RISE Experience is an opportunity for undergraduate students to gain practical knowledge of their major and/or intended career within specified courses. It is an academic and professional development program that challenges students in four areas of growth: research, international, service learning, and experiential learning.

A Unique Position

RISE puts students in a unique position to not only have a better understanding of their own identity and personal growth by way of continued reflection, but also to enhance learning and understanding of their local, national, and global surroundings. Each semester, RISE courses allow students to:

- gain cultural experience at home or abroad
- work with a neighborhood organization
- participate in an internship or field work opportunity
- produce new knowledge or works of art
- participate in a meaningful research project with professors

RISE also provides the skills, knowledge, and experiences that are highly prized by employers and establishes the foundation for future leaders.

IUPUI RISE Experience

THE WORLD IS YOUR CLASSROOM.

“RISE engages students in transformative experiences that will help prepare them to meet the challenges within a complex global society.”

RISE

Research International Service Learning Experiential Learning

Research

As a premier urban research campus, IUPUI is a place where students can become involved in projects that range from fuel-cell technology and biomedical engineering to the impact of homelessness on our society and combating identity theft. There are numerous opportunities to conduct research that leads to new knowledge.

International

Employers are increasingly looking for graduates with competencies related to different cultures and languages. IUPUI is rapidly expanding the opportunities for students to study abroad, participate in collaborative programs with one of our partner institutions abroad, and learn from international students on campus.

Service Learning

Through service activities such as working with children, conducting research for a nonprofit organization, developing a democracy project, or providing medical care to indigent populations, students can learn civic responsibility and engage with different aspects of the global community they might not otherwise encounter.

Experiential Learning

Real work experiences such as internships, student teaching, and clinical placements provide students with involvement in professional settings and practical experience that better prepare them for the workforce. In the heart of downtown Indianapolis, IUPUI provides access to top companies, government offices, and nonprofit organizations.

Your RISE Experience

RISE courses are available every semester. Students can work with their advisor to select the course that best suits their interests and major. Visit rise.iupui.edu to learn more about the benefits of RISE and search for available RISE courses for upcoming semesters.
RISE Day

November 6, 2015
10am-2pm, Lily Auditorium

- guest speaker
- R, I, S, E faculty/student/community session
- student poster presentations
- Q&A panels
- student workshop
  (“How to Market Your Involvement”)

INDIANA UNIVERSITY–PURDUE UNIVERSITY
INDIANAPOLIS
Faculty Survey

- Fall 2015 implementation
  - Course design
  - Student learning outcomes
  - Faculty gains
Next Steps

• Summer Retreat
  o Review of Action Plan
  o Task Force (Curricular and Co-Curricular)
  o Student recognition/rewards
